Question Statement 1:	2
-----------------------------	---

edureka!

Question Statement 1:

Develop a login screen which has user id and password fields and a submit button.

On clicking the submit button, the user's information should be sent to the server and authenticate the user's credentials by checking with the database table user_pass. If the valid user id and password is given then display the message "valid user" else display the invalid user id/password and include the login screen again.
