Question Statement 1:

Write a spring program for the following. Please use hibernate for database operation from spring.

(a) Fetch the employee data from Employee table for the employee name "john marquee" along with the salary details. Compute the salary and display the net salary. Salary details are computed as given below:

Gross salary = basic + hra + da

Net salary = gross salary - (tax deductions + deductions).

Tax is 15% of net salary.

(b) Table structure of Employee in the database.

Id	Integer
Name	Varchar(20)
Basic	Integer
HRA	Integer
DA	Integer
Deductions	Integer

(c) Insert 10 records in the Employee table filling in all the columns and let one of the employee record name be "John marquee".
